SEBASTIAN AGUDELO

Senior Analyst developer (Backend and Frontend)

Software development professional, with advanced skills in web services and apis, plus knowledge and experience in automated testing.

WORK EXPERIENCE

Senior Analyst Developer (Full Stack) - Quipux S.A.S

May 2022 - Currently

We develop technological solutions with high quality standards for governments in the mobility sector in Colombia and Ivory Coast.

Achievements:

- Selected among 100 engineers in the company, to develop together with the software architects the most important project within the company.
- Led the process of adopting unit testing and its implementation in the pipelines, ensuring that all deliveries have high quality standards.
- During my process as lead developer, the company signed a 15-year contract with the Ivorian Ministry of Transport.
- Lead developer and technical project leader for Côte d'Ivoire.
- Winners of the award for Best Latin American Startup in the "Smart Cities and Sustainability" category at the important IDB event: Korea-LAC Business Summit.
- Perform several integrations with different payment platforms in Côte d'Ivoire

Tech stack:

[Java 8, Angular 13, Angular.js 1.5.*, JQuery 3.2.1, JUnit 4.1, Oracle]

Analyst developer (Full Stack) - Quipux S.A.S

February 2019 - May 2022

Software development with Scrum methodology, innovating, creating and implementing technological solutions for the mobility sector in Medellín and Ivory Coast.

- Lead Developer of CGI DIGITAL Côte d'Ivoire (Digital Services Ivory Coast)
- Software developer for the digital services project in Colombia. (Movilidad en Línea)
- Active member of the labor coexistence committee.

Tech stack:

[Software Development, Scrum Methodology, Javascript, Angular, Java^8, Spring, Node.js, Devops, Unit and Automated Testing, leadership]

Automated software testing - Quipux S.A.S

February 2019 - April 2021

Automation of tests and processes (RPA) to optimize and streamline the activities of leaders and management. One of the management processes was optimized, reducing the daily execution time of this task from 1 hour to 2 minutes.

Tech stack:

[Katalon Studio, Groovy, Cucumber, Test automation, QA, RPA]
